U3-1.3a Challenge up: Earworm

An earworm is a song that gets stuck in your head for what feels like forever. In this activity, you need to give Edison an earworm by programming the robot with a tune and a forever block!

What to do

Program Edison to play a song or tune over and over using a forever loop block. Write your program in EdScratch, then download it and test it with your robot.

Don't forget

You can always stop a program by pushing the stop (square) button on your Edison robot.
