## U2-2.3a Change it up: Play a song in a round

### What to do

The first thing you need to do is choose a song for the robots to play. Many nursery rhyme songs work well in a round. One example is the song *Row, Row, Row You Boat.*

Once you choose your song, you will need to program each robot to play it. Each robot's program will be a little bit different as you need each robot to wait until the right time to join in the round.

Test out your programs with your robots. Then put on a musical show.

**Hint!**

Which Control block tells Edison to wait?

1. What song did you choose? Write or draw about how your musical performance turned out!
