

SORTING COMPOST BAGS

Grades TK-8

SORT COMPOST BAGS

Students sort their compost bags.

STEM TIME

40-60 min

Materials:

- worksheet
- scissors

Sorting compost bags instructions:

1. Give the students the worksheets, and have the students use their background knowledge to sort compost.

Ask: “How do we know which items are compostables and which ones are not?”

Example: Compostables can be broken down. So paper, napkins, fruits, and vegetables are compostables.

Ask: “So we know items that can be broken down are compostables. So that means items that cannot be broken down are not compostables. Can you name some?”

Examples: Glass, plastic, aluminum
