**2-ESS2-3 Earth's Systems:** Obtain information to identify where water is found on Earth and that it can be solid or liquid.

Dear Parent,

Looking at the pictures or illustrations is one of the most important parts of reading with your child. Try taking time to point to and talk about all the interesting things your child sees in the pictures of these books.

Aloha from,

Beth and Jake

Can you find these animals in the story?

**NARWHAL**     **POLAR BEAR**

Narwhals are whales with a tusk like a unicorn horn.

Polar bears live and hunt for food on the Arctic ice.

**ORCA WHALE**

**ARCTIC HARE**

**PENGUIN**

**ARCTIC TERN**

Qila, una cría de narval, adora su hogar ártico.  
Pero, oh, cómo desearía poder deambular.

Qila, a baby narwhal, loves her arctic home. But, oh,  
how she wishes she could roam.

A Nanook, un bebé oso polar, le encanta su  
hogar helado, es cierto. Pero también desearía  
tener algo de tierra donde cavar.

Nanook, a baby polar bear, loves his icy home, it is  
true. But, he wishes he had some dirt to dig in too.

Qila asoma la cabeza por un agujero en el hielo.  
"Si pudiera nadar en mar abierto, sería genial", pensó.

Qila pokes her head up from a hole in the ice.  
"If I could swim in the open sea, that would be nice," she thought.

Nanook intentó bailar y jugar afuera, pero resbalaba y caía cada vez que lo intentaba.

Nanook tried to dance and play outside, but he slipped and fell each time he tried.

Un día, la manada de Qila nadó mar adentro.  
Sin hielo grueso, finalmente se sintió libre.

One day, Qila's pod swam far out to sea. With no thick ice, she finally felt free.

Nanook salió de casa para encontrar la orilla del mar. Caminó y caminó, pero ¿dónde podría estar?

Nanook left home to find the edge of the sea. He walked and he walked, but where could it be?

Qila perdió su cápsula. Ahora estaba completamente sola.  
¡Escuchó un fuerte crujido y un chapoteo!  
“¡Ayuda!” ella lloró.

Qila lost her pod. She was now all alone.  
She heard a loud crack and a splash!  
“Help!” she cried.

El fino hielo se había roto bajo los pies de Nanook. Nanook cayó al mar helado.  
“¡Ayuda!” gritó.

The thin ice had broken under Nanook’s feet. Nanook fell into the icy sea. “Help!” he cried.

Una manada de orcas estaba cerca. Qila nadó hasta un trozo de hielo para esconderse. Vio al bebé oso polar.

A pod of orca whales was near. Qila swam to a piece of ice to hide. She saw the baby polar bear.

Nanook se subió a la cima del hielo flotante. Escuchó el grito de ayuda de Qila y vio al bebé narval.

Nanook got on top of the floating ice. He heard Qila's cry for help and saw the baby narwhal.

Qila estaba tan quieta como podía estar.  
"¡Espero que la orca no intente comerme!"

Qila was still, as still as could be.  
"I hope the orca won't try to eat me!"

"¡Creo que puedo ayudarte! ¡Sé lo que tengo que hacer!" dijo Nanook.

"I think I can help you! I know what to do!" said Nanook.

Saltó al agua y le dio a Qila un gran abrazo de oso. Su pelaje era tan blanco como la nieve. Los escondió de las orcas.

He jumped into the water and gave Qila a big bear hug. His fur was as white as the snow. It hid them from the orcas.

Qila encontró su cápsula y ahora le tocó ayudar a su nueva amiga.

Qila found her pod and now it was her turn to help her new friend.

Empujó a Nanook de regreso a la gruesa capa de hielo del Ártico, donde estaba a salvo nuevamente.

She pushed Nanook back to the thick Arctic ice sheet where he was safe again.

A Qila le gusta su hogar bajo el espeso hielo del Ártico. "Este hielo es bueno", le dice a su mamá.

Qila likes her home under the thick Arctic ice. "This ice is nice," she says to her mom.

Nanook también está feliz de volver con su mamá. Le gusta su hogar blanco y helado.

Nanook is happy to be back with his mom too. He likes his white, frozen home.

## Coal Power

When we burn coal and oil for energy, gases are released that cause Earth's climates to warm up. Warming climates caused by human activities are causing Earth's Arctic ice to melt.

## Wind Power

Solar and wind power can give us energy and do not cause Earth's climates to warm. When we use clean energy we can help stop Arctic ice from melting so Arctic animals can have a safe home.
